

School District 19
(Revelstoke)

Revelstoke Board of Education

Policy Manual

3.2 Home Schooling Support

The Revelstoke Board of Education offers a wide variety of quality program options in the regular school setting. This setting is viewed as the most suitable for students to pursue their education. For some students, because of preference or particular circumstances, home schooling may be a possible option. The Board offers limited support to home schooled students.

The purpose of offering support is to provide parents the opportunity to design and deliver an education program for their children in a home setting.

Guidelines:

1. The student will be registered at their neighbourhood school.
2. The school will provide, when available, curriculum materials and learning resources.
3. The parents agree to undertake curriculum that meets the requirements of the *School Act* and appropriate assessment to monitor progress in the student learning plan.
