

School District 19
(Revelstoke)

Revelstoke Board of Education

Policy Manual

4.14 Use of Surplus Space

Space may, from time to time, become surplus to School District requirements. Such surplus space may be considered:

- 1) short term – not required for educational needs in the next five years;
- 2) long term – not required for educational needs in the foreseeable future, more than five years or permanently.

Surplus space may be made available for alternative use on a rental or lease basis.

Surplus space will not be made available for purposes that provide programs and services that compete with those provided by the School District. Exceptions must be authorized by the Board and be based on long-term benefit to public education in the School District.
